

7 reasons why DER BLAUE is so unique!

- ✓ The all-round flexible sealing lip directs water splashes into the collection tub in a safe and clean way.
- ✓ Due to the integrated flexible, bending metal elements, the tub is flexibly adjustable and fits just about any given locality, around pipes, valves and all kinds of irregular wall patterns.
- ✓ Once the collection tub has been fitted, it remains stable in shape and stands securely.
- ✓ Up to 1.500 liters of water can be drained away in one go / with one battery charge.
- ✓ Second man:.. Once the water is flowing, you have your hands free and can work even more efficiently.
- ✓ The spaciousness as well as the excellent formability make DER BLAUE the ideal choice in all circumstances.
- ✓ Whether low or narrow, whether square or round – DERBLAUE remains the best choice.

DER BLAUE: the best system to collect water perfectly!

DERBLAUE®

fast - clean - easy

The most versatile system for collecting water everywhere in a clean, fast and easy way.

Features

Due to the integrated bending metal elements the collection tub can be adjusted optimally, it remains stable in shape and stands securely.

The soft and adaptable sealing lip allows for individual adjustment to the current subsurface and facilitates clean, efficient and professional work.

The submersible pump fits perfectly in the corresponding lug, and can either run with mains power or with a rechargeable battery. Extraction is possible down to a 5 mm level.

Examples of use

Fast

Drain radiators, heating lines and entire heating systems.

Clean

Replace pumps, valves and expansion vessels.

Easy

After sales service of boilers and heaters.
